

REGIONAL WORKSHOP FOR THE COUNTRIES OF LATIN AMERICA AND THE CARIBBEAN PRESENTING VNRS IN 2020

United Nations
Global Compact

Designing a process to integrate private sector contributions into Voluntary National Reviews

1. The goal of this exercise is to construct a strategic process for the integration of private sector contributions into Voluntary National Reviews. It also seeks to reflect on the ways second generation VNRS can drive forward the alignment of business practices with the 2030 Agenda.
2. You will receive a worksheet with some guiding question to facilitate the group's discussion. We suggest that you also consider the best practices shared during the panel and how they might apply to the situation in your country.
3. In order to answer the question on the first worksheet, we recommend that you write your ideas on post-its and come to an agreement with your group about the 2 or 3 key reasons to integrate private sector contributions into your VNR.
4. On sheets 2 and 3 you will find some guiding questions to consider in the construction of your process.
5. We suggest that each group nominate a person who captures the key ideas and outlines your process on the flipchart.
6. Each group will have to present its process and share the key points of the group's discussion.
7. You have 40 minutes for the exercise

Considering the experience of your country and the practices shared in the panel, what do you consider to be the added value of integrating private sector contributions into Voluntary National Reviews?

3.

Designing a process to integrate private sector contributions into Voluntary National Reviews

**Which are the priority
business sectors for
sustainable development
in my country?**

**Who are my main counterparts
and stakeholders in the private
sector?**

**Is there a consultative
mechanism or space to engage
with the private sector in my
country? If there is one, is it
well suited for this process?**

Designing a process to integrate private sector contributions into Voluntary National Reviews

What would be your methodology to collect and systematize the inputs of the private sector?

Which would be the best strategies to obtain data and indicators that reflect the contribution of the private sector?

Which stakeholders could support the State in implementing this methodology?
