Water and Beyond

EU transformative approaches for international partnerships

Together, the Government of Slovenia, the Government of Portugal and the European Commission Directorate-General for International Partnerships (DG INTPA – formerly DG DEVCO) are hosting the high-level event **‘Water and beyond – EU transformative approaches for international partnerships’**, from 18 – 21 January 2021.

‘Water and Beyond’ will deliver insights on how to strengthen transboundary cooperation, build broader partnerships and trigger water investments in support of the Sustainable Development Goals and the Paris Agreement. It will create meaningful connections between thematic silos for the formulation and implementation of water policies, projects and programmes. It will also lay the groundwork for applying the European Union Priorities for International Partnerships in the water sector and will make the link with programming and the Team Europe approach.

The online event will stretch over four days, with high-level panels, thematic sessions and networking opportunities to facilitate contacts between participants with common interests who wish to foster ongoing or future cooperation.

The 4-day online event will gather:

- government representatives from the European Union institutions (Commission, Parliament, Delegations), from EU Member States and EU partner countries, including policy-makers from ministries addressing agriculture, energy, environment and water;
- national and international experts from private and public water entities, development agencies, financing institutions and civil society.

Seven technical sessions on various water-related topics will be flanked by a high-level opening and closing session led by relevant political leaders. Topics to be discussed include:

- Water as an equaliser: realising impact for human development
- Water as a catalyst for cooperation: fostering trust and peace
- Bridging the financial gap: investing in SDG 6
- The water-climate nexus: from extreme events to opportunities
- With knowledge and skills: water as the engine for economic development and jobs
- Water and environment: working to build resilience
- Water as a human right: working towards implementation with all partners

These sessions are co-hosted by prominent European and international partners in the water sector, namely: the United Nations Educational, Scientific and Cultural Organization (UNESCO), the United Nations Economic Commission for Europe (UNECE), Women for Water Partnership, WaterAid (WfWP), and Bremen Overseas Research & Development Association (BORDA). Each session will feature a number of high-level technical keynote speakers, among which are the EU Commissioner for Crisis Management, the Slovenian Minister for Development, the Portuguese Secretary of State for Foreign Affairs and Cooperation, Executive Secretaries of several basin Commission, the Special Envoy for International Water Affairs for the Kingdom of the Netherlands, the UN Special Rapporteur on Human Rights to Safe Drinking Water and Sanitation, the UNECE Executive Secretary, the Associate Director for WASH at the United Nations International Children’s Emergency Fund (UNICEF) and the CEO of Water and Sanitation for All.

The event will be held in English and French, with simultaneous interpretation.

ONLINE EVENT FROM THE BLOOM HOTEL, BRUSSELS, BELGIUM.
