

An in-depth look at the GVC Development Report 2021

June 22, 2022 – Zoom, All times in Chile Standard Time (UTC-4)

Description:

The Global Value Chain (GVC) Development Report 2021, the third edition of a biennial series among different partners, explores the long-term trends in GVCs and the factors shaping them. The report breaks new ground by providing an analysis of GVCs beyond manufactured goods, detailing how value added in GVCs is increasingly generated through intangible products, such as services and intellectual property. The report also highlights that GVCs have proven to be resilient in the face of the challenges posed by the COVID 19 pandemic as well as environmental and geopolitical shocks and sheds light on their importance for the global economic recovery.

Following the presentation of the GVC Development Report 2021, a roundtable will be hosted with the support of UN ECLAC to discuss the way forward for GVCs and policies to make them more resilient and sustainable in a post-pandemic world. This will include examining options for developing countries in Asia and Latin America and the Caribbean (LAC) to promote regional and global value chains in strategic sectors such as pharmaceuticals, medical equipment, electromobility, and agroindustry, among others.

Government officials in charge of trade and industrial policies, policy makers in general and representatives of the the LAC region's main economic integration schemes are invited to participate in the event.
