Virtual Webinar

UNDERSTANDING FELA: THE GLOBAL FRAMEWORK FOR EFFECTIVE LAND ADMINISTRATION

UN-GGIM: Americas Land Administration Working Group

Facilitated by UN-GGIM: Americas

Wednesday, September 23

01:00 PM UTC

CONCEPT NOTE

Introduction

The Framework for Effective Land Administration (FELA), adopted by the United Nations in 2020, has been developed under principles, guidelines and policies aligned with the Integrated Geospatial Information Framework (IGIF).

Currently, the UN-GGIM: Americas Land Administration Working Group has identified the need to significantly expand dissemination, especially among senior university students and young professionals.

It is essential that the guidelines and recommendations contained in FELA are known and incorporated from the early stages of education.

The webinar is open to all professionals interested in acquiring the key concepts presented by FELA and learning about international implementation experiences.

Main objectives:

- Promote UN-IGIF among students and young professionals.
- Showcase FELA implementation experiences from other countries.
- Encourage young professionals to incorporate these topics into their professional practice.

Agenda (UTC)

Time	**Activity**
