URUGUAY'S ENERGY SUCCESS STORY

URUGUAY HAS SHOWN GREAT POTENTIAL

Electricity consumption per capita

3,255 kWh/inhab.

Urban and rural electrification rate

99.9%

Electricity generation

(% share by source, 2021)

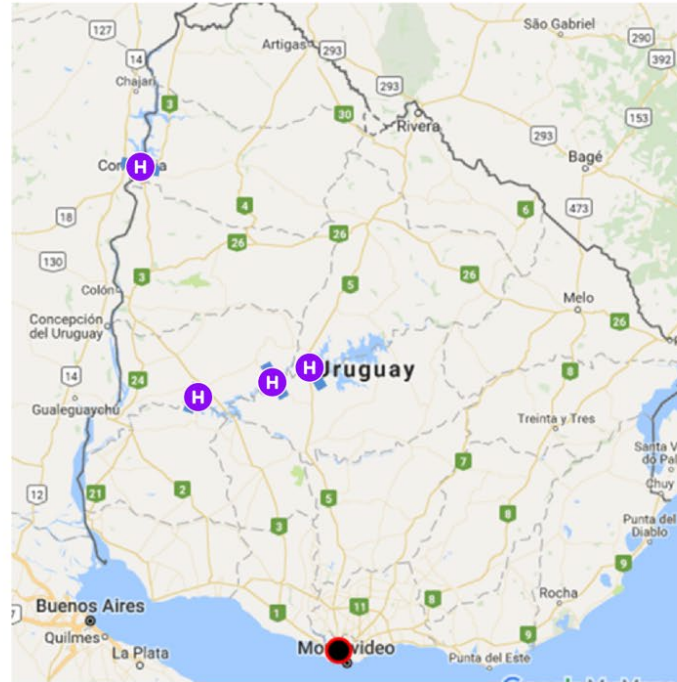

[+ INFO](#)

Uruguay
TOTAL 2021
15,953GWh

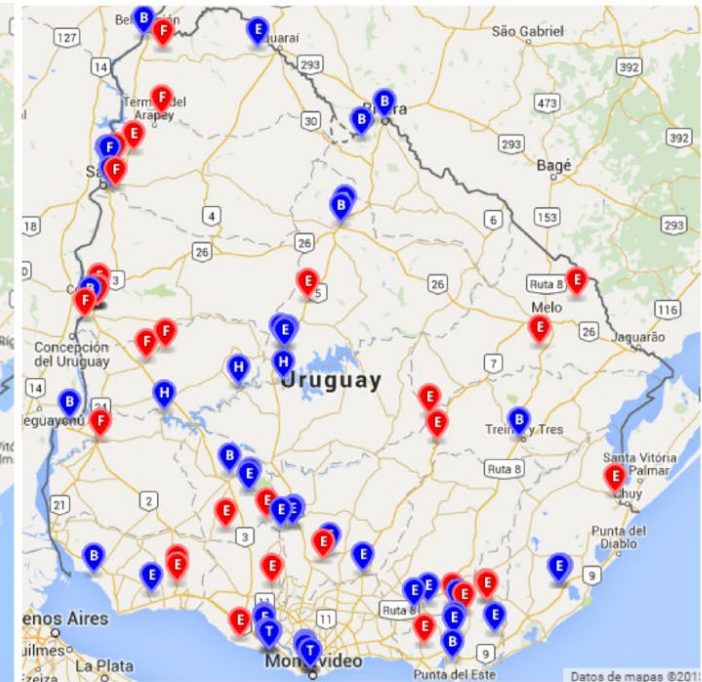

- Hydro
- Wind
- Thermal biomass
- Solar
- Thermal fossil

Power Generation (before)

Distributed Power Generation (now)

Over 90% renewable power over more than 5 years

URUGUAY ENERGY CLIMATE CHANGE CHALLENGES

TODAY WE ARE MOVING TO OUR SECOND ENERGY TRANSITION: TRANSPORT AND INDUSTRY

H2 Roadmap

TARGETS and SECTORS

2025

First pilots:
2 – 25 MW Electrolyzers

Confirmation of first medium
scale for exports:

- 150 - 300 MW Electrolyzers
- 200 - 500 MW Renewable
energies

Domestic heavy transport
Export: E-FUELS, metanol

2030

1 - 2 GW Electrolyzers

2 - 4 GW Renewable
energies

Expansion nationwide,
export of derivatives

2040

10 GW Electrolyzers

20 GW Renewable
energy

E-fuels, metanol,
hydrogen, ammonia

URUGUAY ENERGY and GENDER

MUCH TO BE DONE
