

Highlights

1. Marketplace activity

Marketplace traffic totaled 19.1 million visits in 2022, a 4.2 per cent increase from the previous year (Figure 1.A). The rise can be attributed to transactional sites, which increased 23.1 per cent y.o.y (Figure 1.B). On the other hand, the visits to non-transactional sites decreased 8.6 per cent y.o.y (Figure 1.B). Most marketplace activity in Guatemala remains concentrated in global marketplaces, which account for around 68 per cent of total traffic.

Guatemala's impact on the overall regional traffic is minor, accounting for a contribution of 0.1 per cent (Figure 3). In 2022, the percentage of cross-border visits to sites targeting to the country as a share of total visits was 20.5 per cent (Figure 2).

2. Marketplace landscape

In 2022, there were 40 active B2C marketplaces for goods in Guatemala. The top 10 most visited marketplaces concentrated 86.8 per cent of total traffic (Table 1). eBay was the most popular marketplace, with 40.2 per cent of total traffic, followed by Mercado Libre, with 11.1 per cent. Traffic from Guatemala to foreign global marketplaces stood at 47.5 million, 5.9 percent lower than in 2021. The most visited global site was Amazon, with 62.6 per cent of total traffic in global marketplaces (Figure 5.B).

The fastest growing marketplaces in 2022 were CarroCarros, a classifieds site specialized in automotive vehicles (such as cars, trucks, and motorcycles) and related services and products; Nuevo Anuncios, Vive Nicaragua and Predio virtual, all classifieds sites, and NetIQ, a global coupon site (Figure 4).

3. Regional digital trade integration index

From the analysis of relevant policies for the integration of digital trade, the Regional Digital Trade Integration Index (RDTII) shows Guatemala's performance compared to other LAC countries. The analysis integrates the scores of 12 pillars using a simple average method, where each pillar of the DTII is the weighted average of the indicator-level scores. Indicator scores range from "0" to "1" (where 0 indicates a better integration index) and are based on a review of existing policies and regulations, including those for ICT goods, intermediate goods, and inputs; digital delivery services; foreign investment in sectors relevant to digital trade; and use of personal data. The framework covers two components of digital trade policies, namely restrictions and enabling policies.

About the LAC Marketplace Explorer

The Latin America and the Caribbean Marketplace Explorer maps and monitors activity on retail e-commerce marketplaces across the region. It covers visitor traffic and other main characteristics of almost 900 marketplaces and more than 2,900 marketplace websites. It was developed by the ecomConnect team at the International Trade Centre (ITC), the United Nations Economic Commission for Latin America and the Caribbean (UN-ECLAC), and the Centre for Market Insights of the Amsterdam University of Applied Sciences, with the support of the Forum for East Asia-Latin America Cooperation (FEALAC).
