

LAUNCH OF THE INCLUSIVE GREEN GROWTH PARTNERSHIP 7 DECEMBER 2015, PARIS

The Inclusive Green Growth Partnership aims to support developing countries to identify green growth opportunities and investments that promote inclusive, shared prosperity and equitable growth that creates employment and raises the incomes of the poorest.

The Partnership, a joint initiative of the Global Green Growth Institute together with the multilateral development banks and the United Nations regional commissions, will be launched at the 21st Conference of the Parties (COP21) to the United Nations Framework Convention on Climate Change.

By joining forces in addressing policy barriers and promoting social inclusion at the country level the Partners can significantly increase their impact in a complementary and coordinated way, including in areas such as green cities, water, energy and land use.

The high-level launch event will include a signing ceremony, two high-level panels, and a reception and dinner for the Partners. The high-level panel discussions will focus on:

1. New finance solutions to support developing countries to deliver on the Sustainable Development Goals and Intended National Determined Contributions
2. Overcoming the policy challenges to mainstream green growth in developing countries
