

WASTE

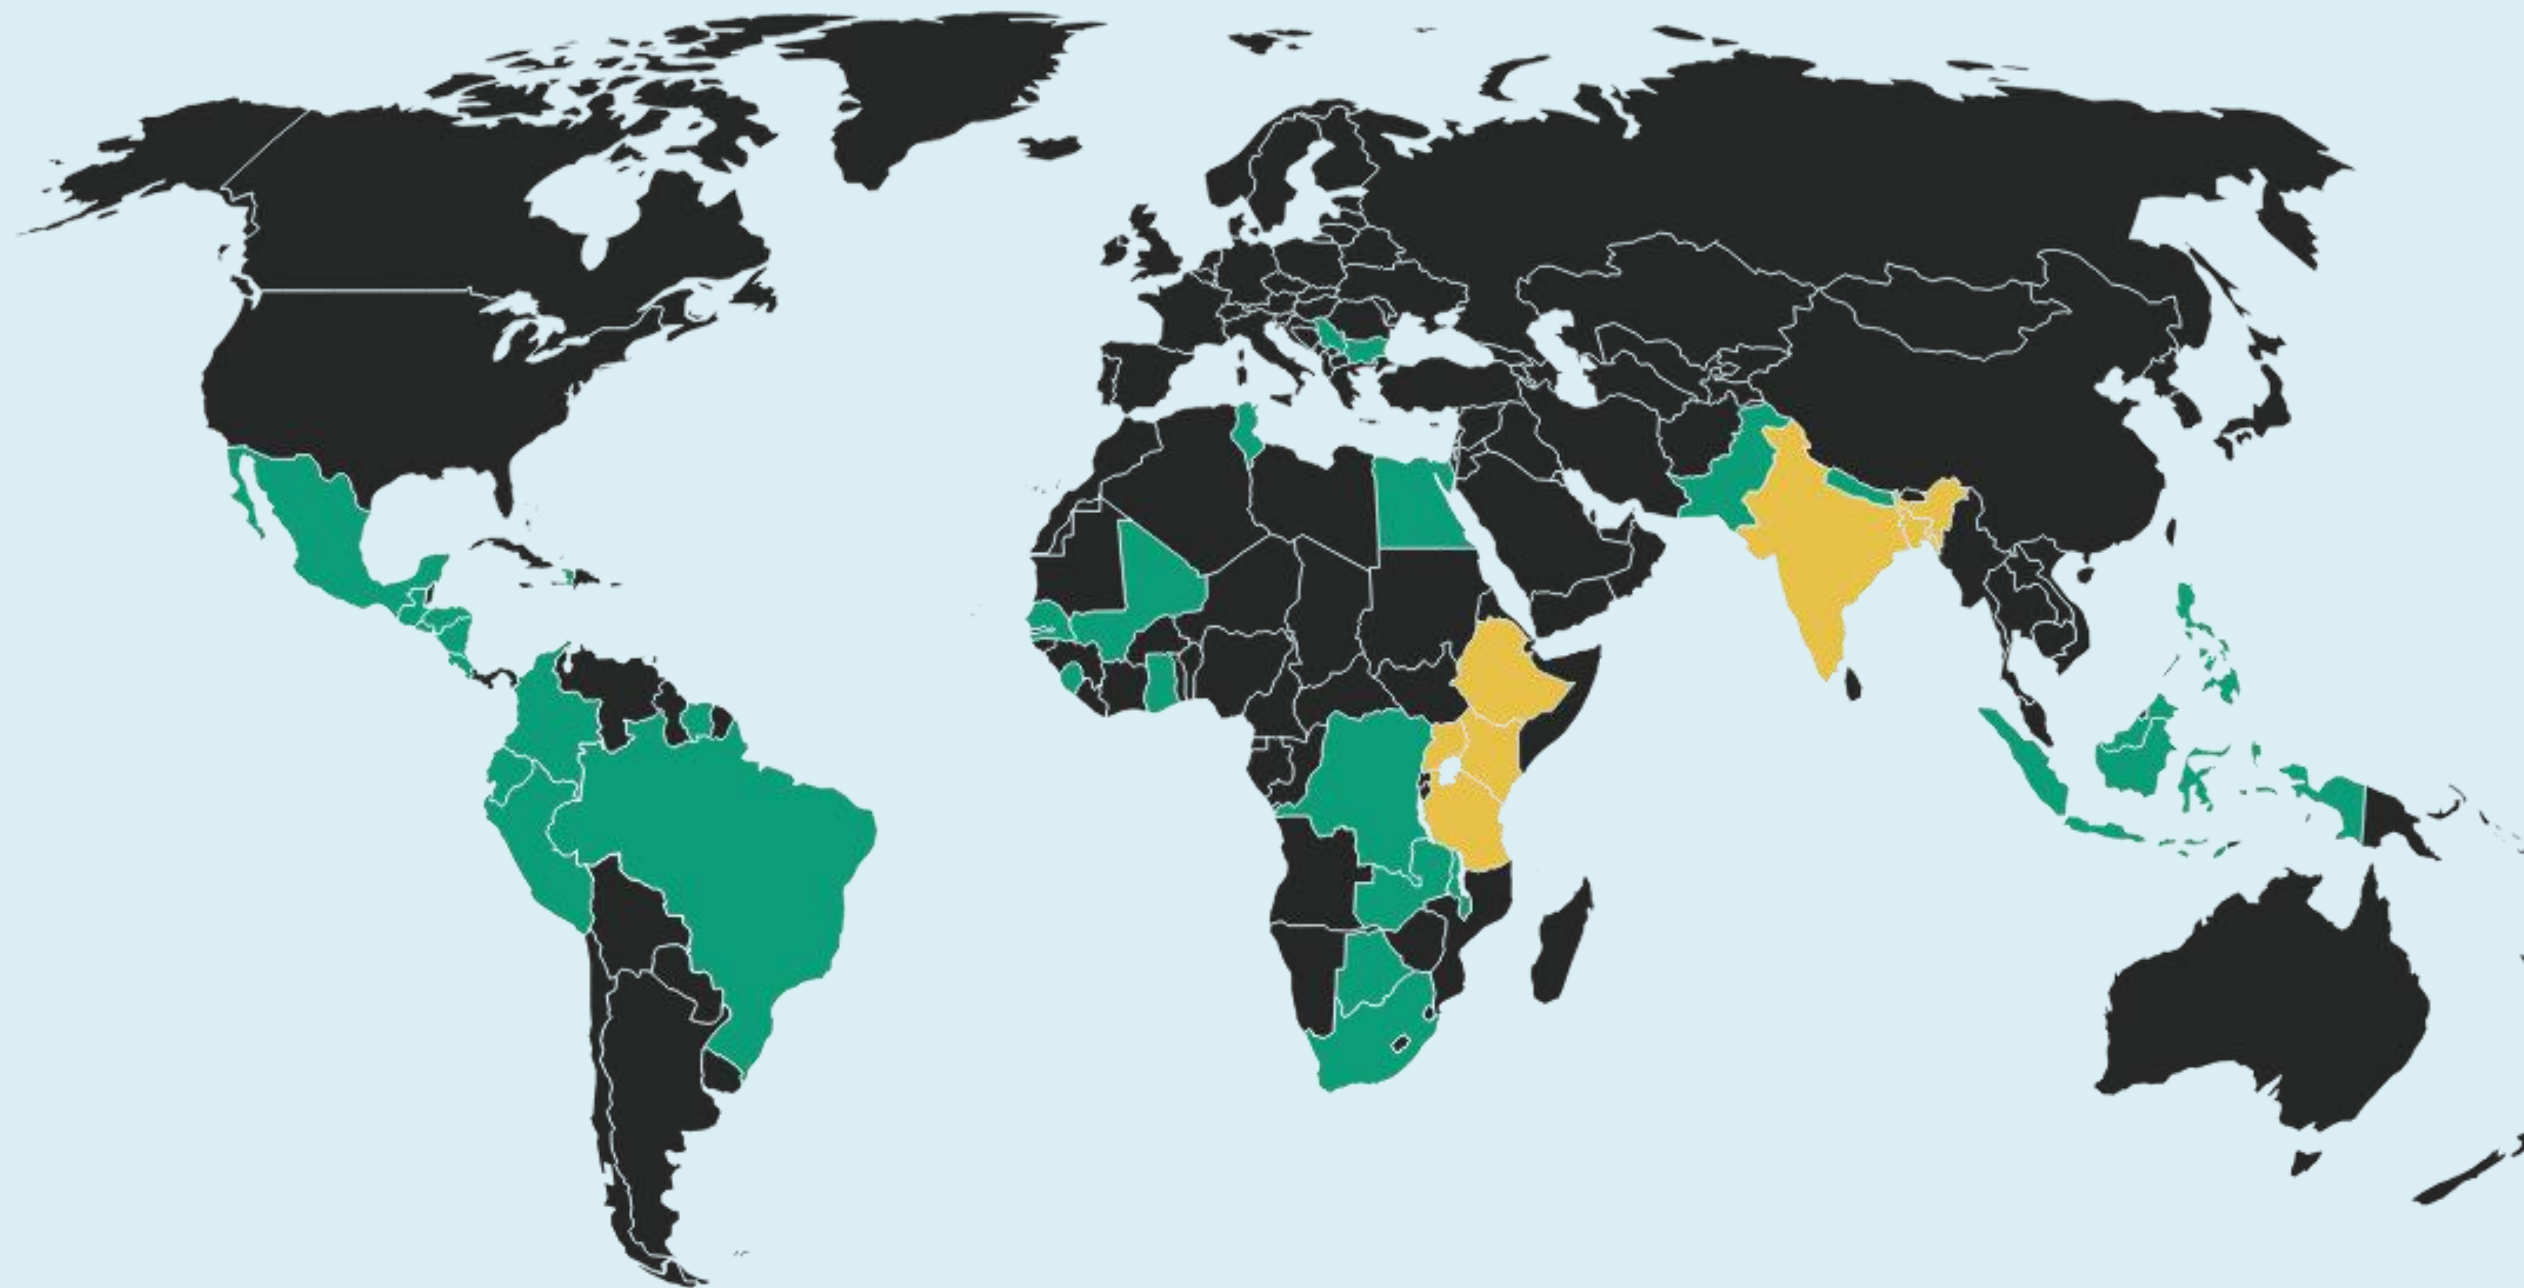

“WASTE dreams of a world where everyone has access to a clean and healthy environment driven by inclusive system-led change.”

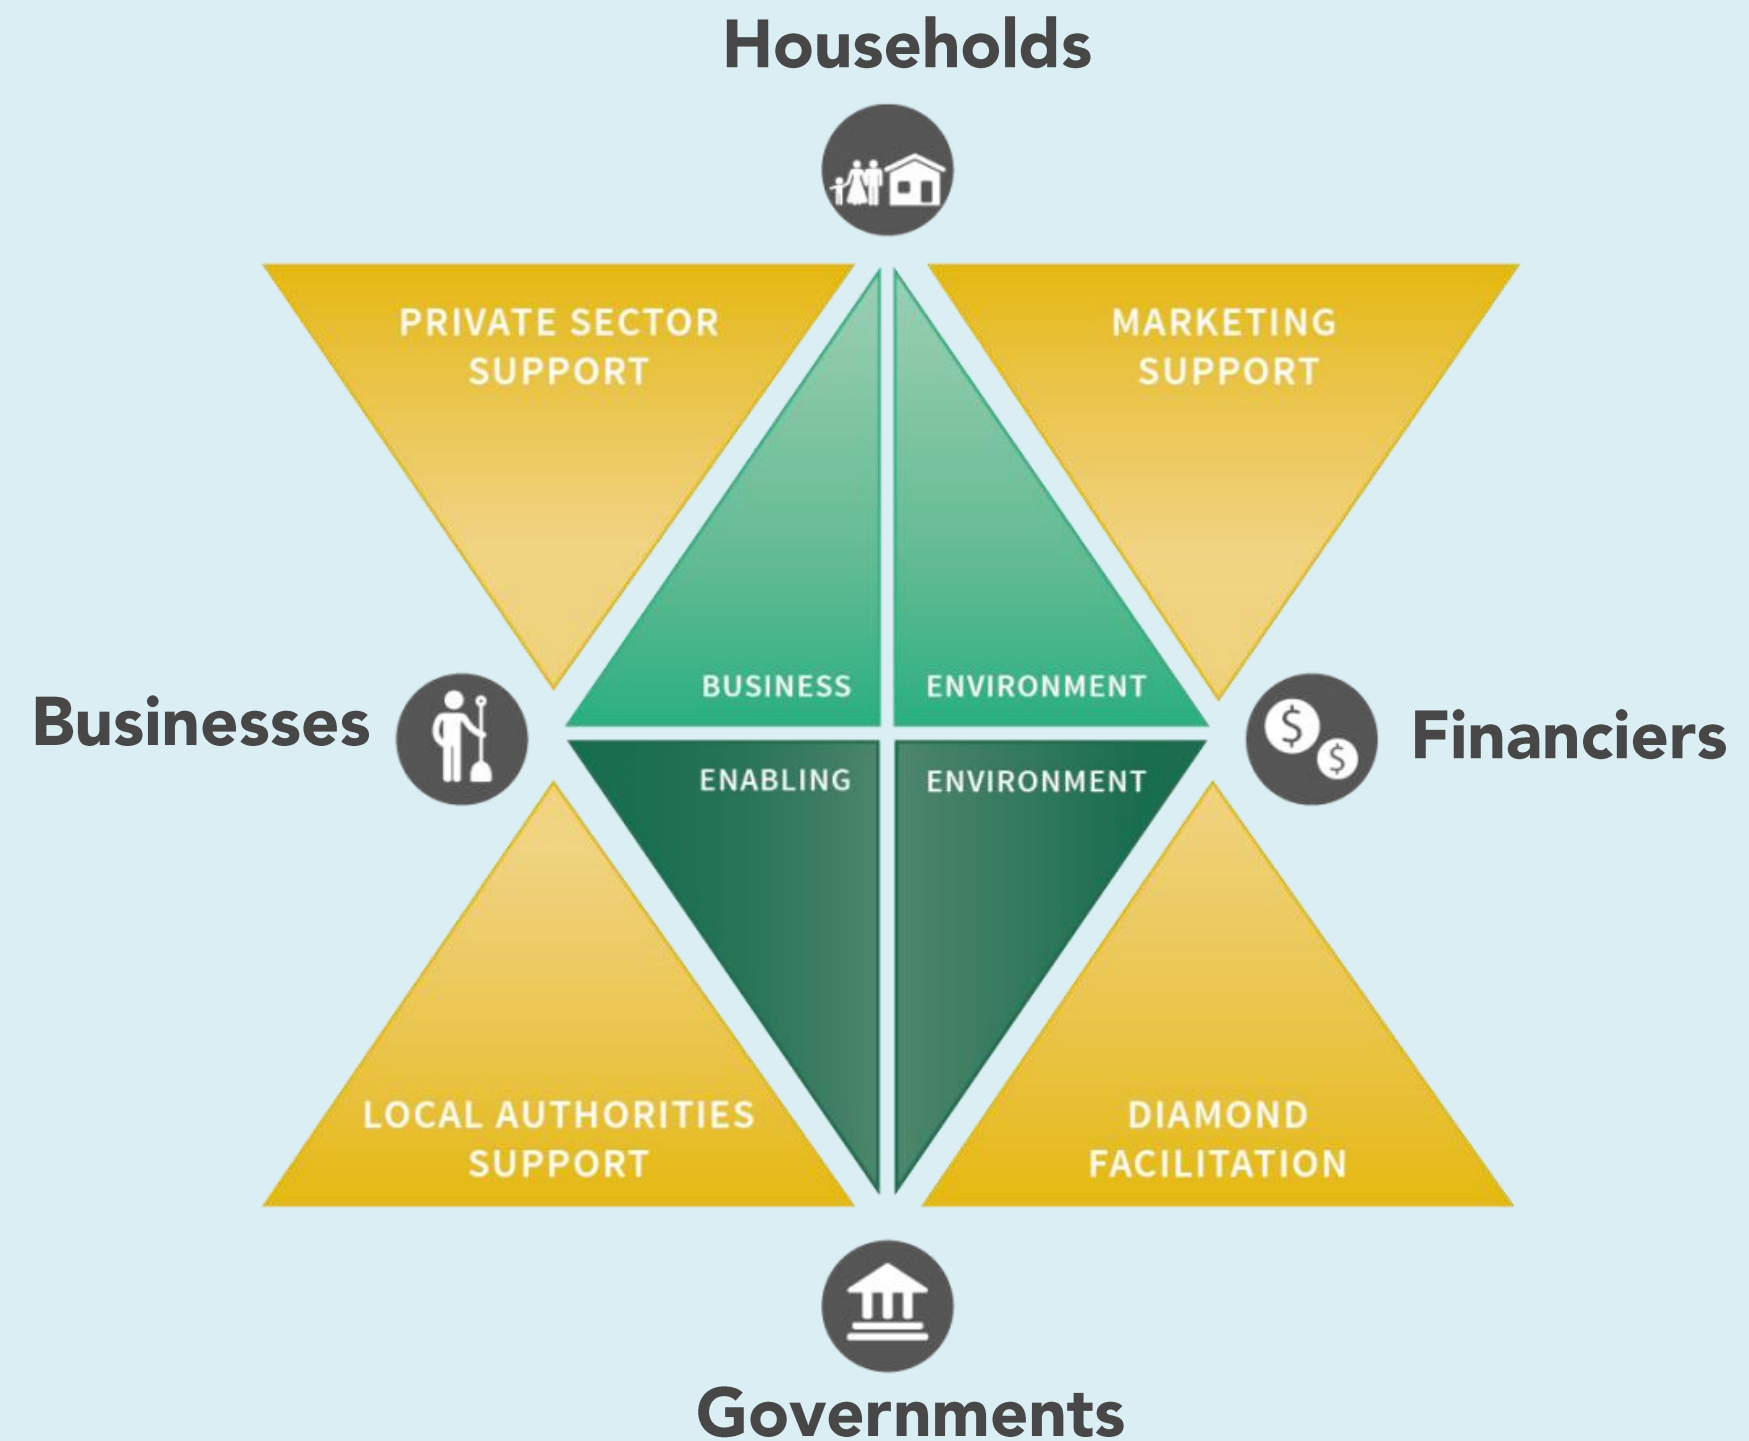

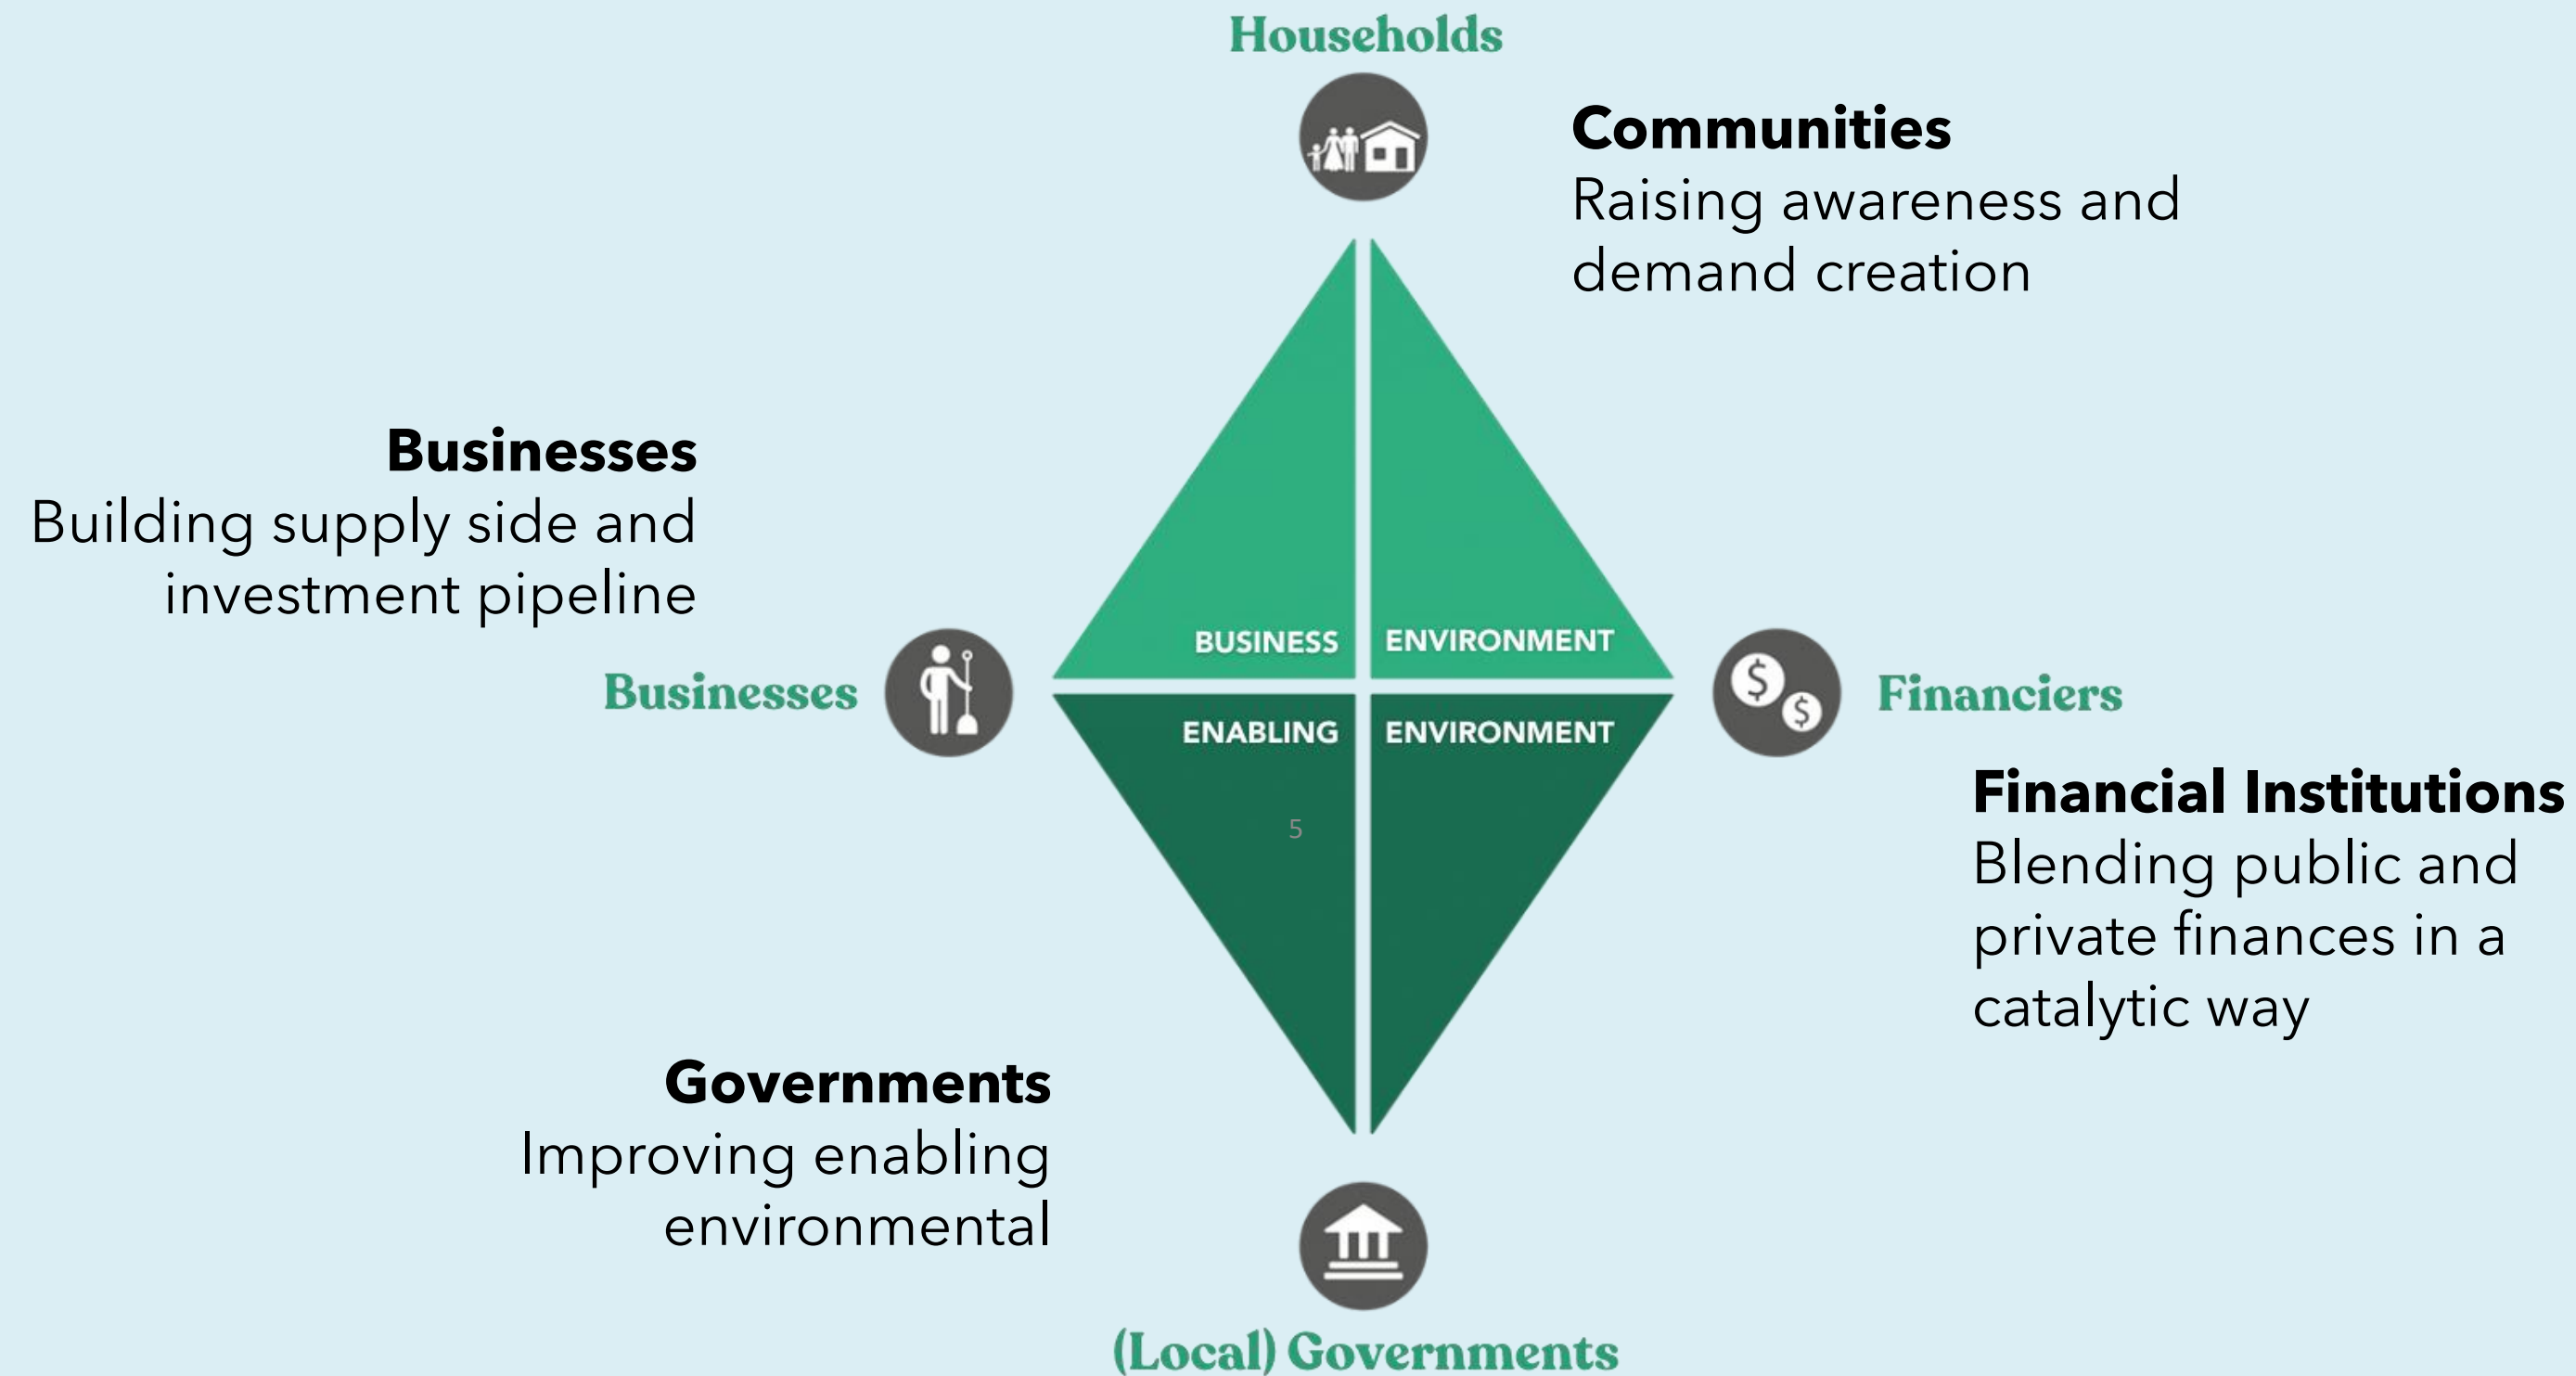

For over 40 years we have been **working together with local partners to catalyse scalable, system-led solutions** to urgent solid waste, sanitation and water challenges in **low-and middle-income countries across the world.**

**Solutions rooted in  
the local context  
which bring all  
stakeholders  
together.**

# Working through our multi-stakeholder **Diamond Approach**

# What we have achieved together over the last year

**Over 300,000  
safe sanitation  
systems**  
constructed through  
programme facilitation

**4,800 local  
businesses  
supported**  
across the sanitation and  
waste sectors

**>€112 million  
leveraged**  
in WASH and waste  
markets

**168 million litres  
of water saved**  
through safely treating  
and reusing water

**3,650 tonnes of  
plastic waste  
recycled**  
strengthening the local  
economy

**Saved 247,000+  
kg of CO2**  
eq. greenhouse gas  
(GHG) emissions

# Reflections on Regional Water Week for Latin America and the Caribbean 2025

**Sustainable WASH financing is not only about more capital, it's about designing systems where every actor has a reason to perform and a path to grow.**

- Scale must be built into financial design
- Blended finance is a tool for ecosystem design, not only a source of funding
- Strengthening SMEs is key to financial sustainability
- Proven financial structures demonstrate that blending can mobilise private capital
- Governance and technical assistance are essential components of financial derisking
- The next frontier is connecting water security finance with local execution
