Prices and Volume Measurement
Guide of Services Sector
CEA CEPAL Working groups

October 2020
Background

- Different efforts have been made at regional and international level, to document the methodologies for deflators calculations, focused on analyzing goods. However, there are few references for services sector.

- The services sector has been gaining an increasing importance in countries economy. In this sense, it is necessary to build a technical document based on Latin America services deflators, considering experiences and individual features in this countries.

- The document aim is to be a reference of prices and volume measurement in services sector for the National Statistical Offices at Latin America area, contributing the data improvement and enable the good practices implementation related with strengthening statistics.
Objectives

Main goal
Elaborate a technical document complying experiences about prices and volume measurement in services sector at Latin America region, as a reference of analyzing the measurement problems that arises in this sector.

Specific goals

- Identify and discuss the experiences and good practices related with prices and volume measurement in the services sector.

- Compile regional experiences based on prices and volumes measurement in the services sector.
Expected effect

The Prices and Volume measurement guide in the Service Sector will be used as a tool for:

- Enhance estimations in terms of volume in the services sector.
- Determine participation of the sector in the Gross Domestic Product.
- Improve the data compatibility based on theoretical background and considering the experiences and good practices of the region countries.
- Participate the experiences and good practices replicable at regional level that contributes to the statistics enhancing.
**Event**

Working group conformation (Argentina, Brazil, Peru, Cuba, Chile, Mexico, Panamá y Colombia)

February – 2020

Outline elaboration and definition. Work sessions was held assigning and distributing responsibilities. July - 2020

Compiled experiences and Good practices

October - 2020

**Future steps**

1. Compiling experiences and Good practices

   October - 2020

2. Document construction

   January - 2021

   Document review and comments

   June - 2021

3. Working paper final version

   November - 2021

4. Document publication

   December - 2021
Document content table

1. Introduction
2. Objectives
3. Scope and delimitation
4. Theoretical framework
5. Experiences about prices and volume measurement in service activities in CEA CEPAL countries working group (every member of ONE'S group).
   5.1. Electricity, gas, steam and air conditioning supply, water distribution, sewage disposal and treatment, waste management and environmental sanitation activities,
      5.1.1. Information resources
      5.1.2. Methods and techniques
      5.1.3. Results
   5.2. Construction
      5.2.1. Information resources
      5.2.2. Methods and techniques
      5.2.3. Results
5.3. Wholesale and retail trade, motor vehicle and motorcycle repair, transportation and storage, accommodation and food services activities.
   5.3.1. Information resources
   5.3.2. Methods and techniques
   5.3.3. Results

5.4. Communication and information
   5.4.1. Information resources
   5.4.2. Methods and techniques
   5.4.3. Results

5.5. Financial and insurance activities
   5.5.1. Information resources
   5.5.2. Methods and techniques
   5.5.3. Results

5.6. Real estate and insurance activities
   5.6.1. Information resources
   5.6.2. Methods and techniques
   5.6.3. Results
5.7. Professional, scientific, technical, administrative and support services activities
   5.7.1. Information resources
   5.7.2. Methods and techniques
   5.7.3. Results

5.8. Public administration and defense, compulsory affiliation of social insurance plans, education human health and social services activities.
   5.8.1. Information resources
   5.8.2. Methods and techniques
   5.8.3. Results

5.9. Artistic, entertainment and recreation activities and other services activities. Individual households as person quality activities, undifferentiated activities of individual households as producers of goods and services for their own use.
   5.9.1. Information resources
   5.9.2. Methods and techniques
   5.9.3. Results

6. Conclusions and bibliography.
