

SUBJECTIVE WELL-BEING MEASURES IN LAC

Policy experiences in the LAC region

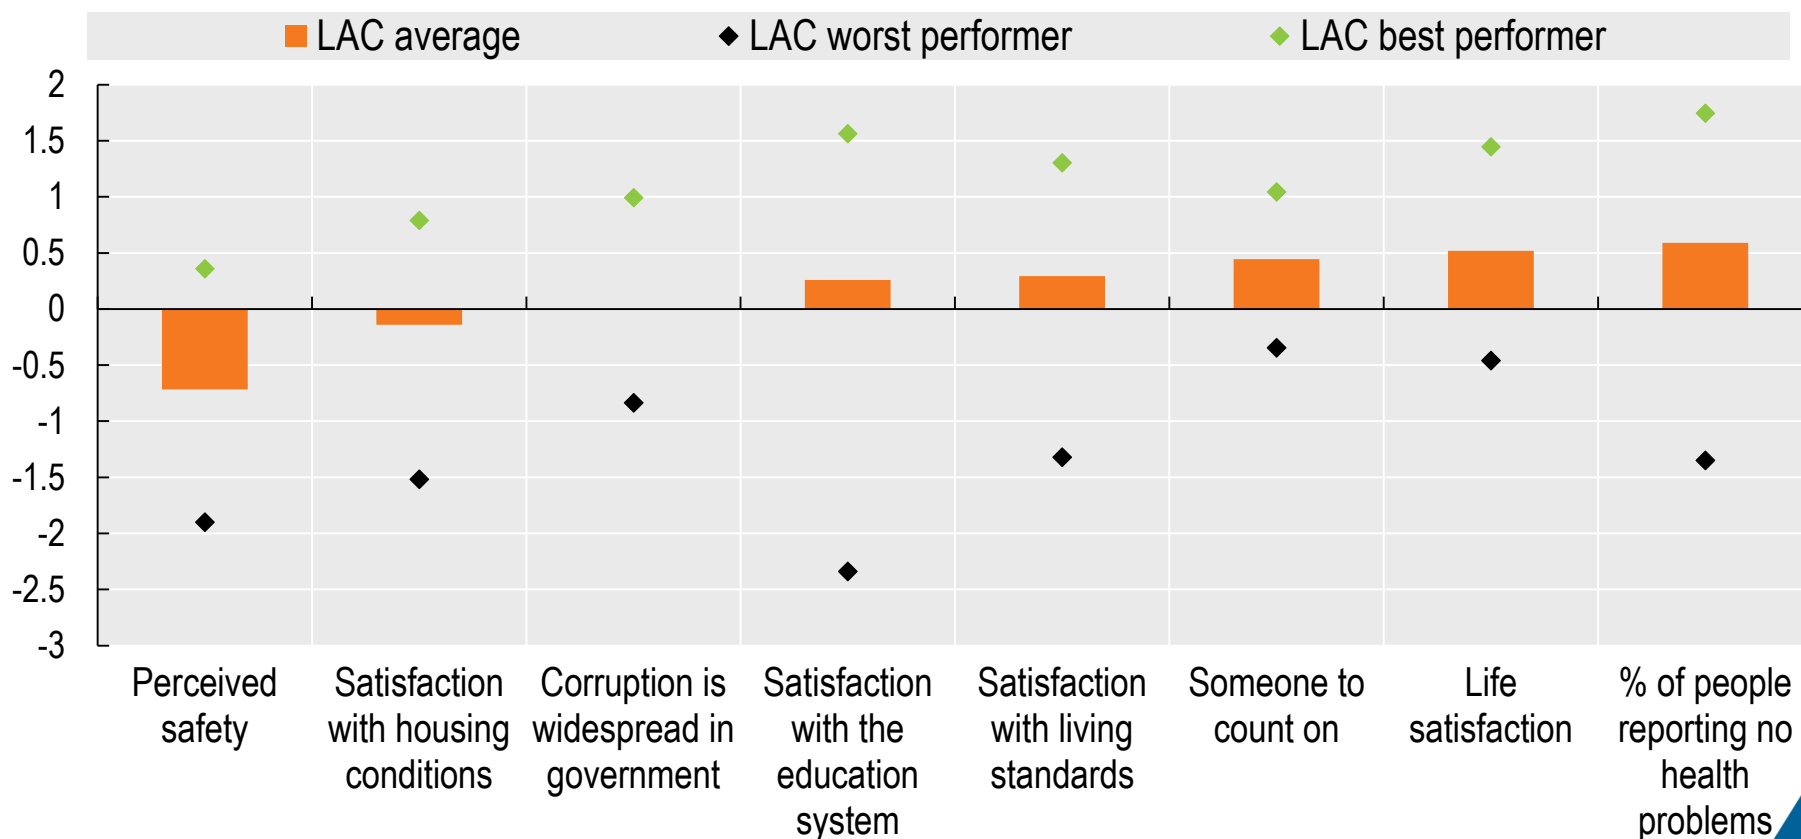

Sebastian Nieto Parra
Head of the Latin America and the Caribbean Unit
OECD Development Centre

“Metrics for Policies for Well-being and Sustainable
Development in LAC” Webinar Series
Friday, October 2th, 2020

Subjective well-being measures vs GDP per capita: Fundamental to use subjective measures in policy-making

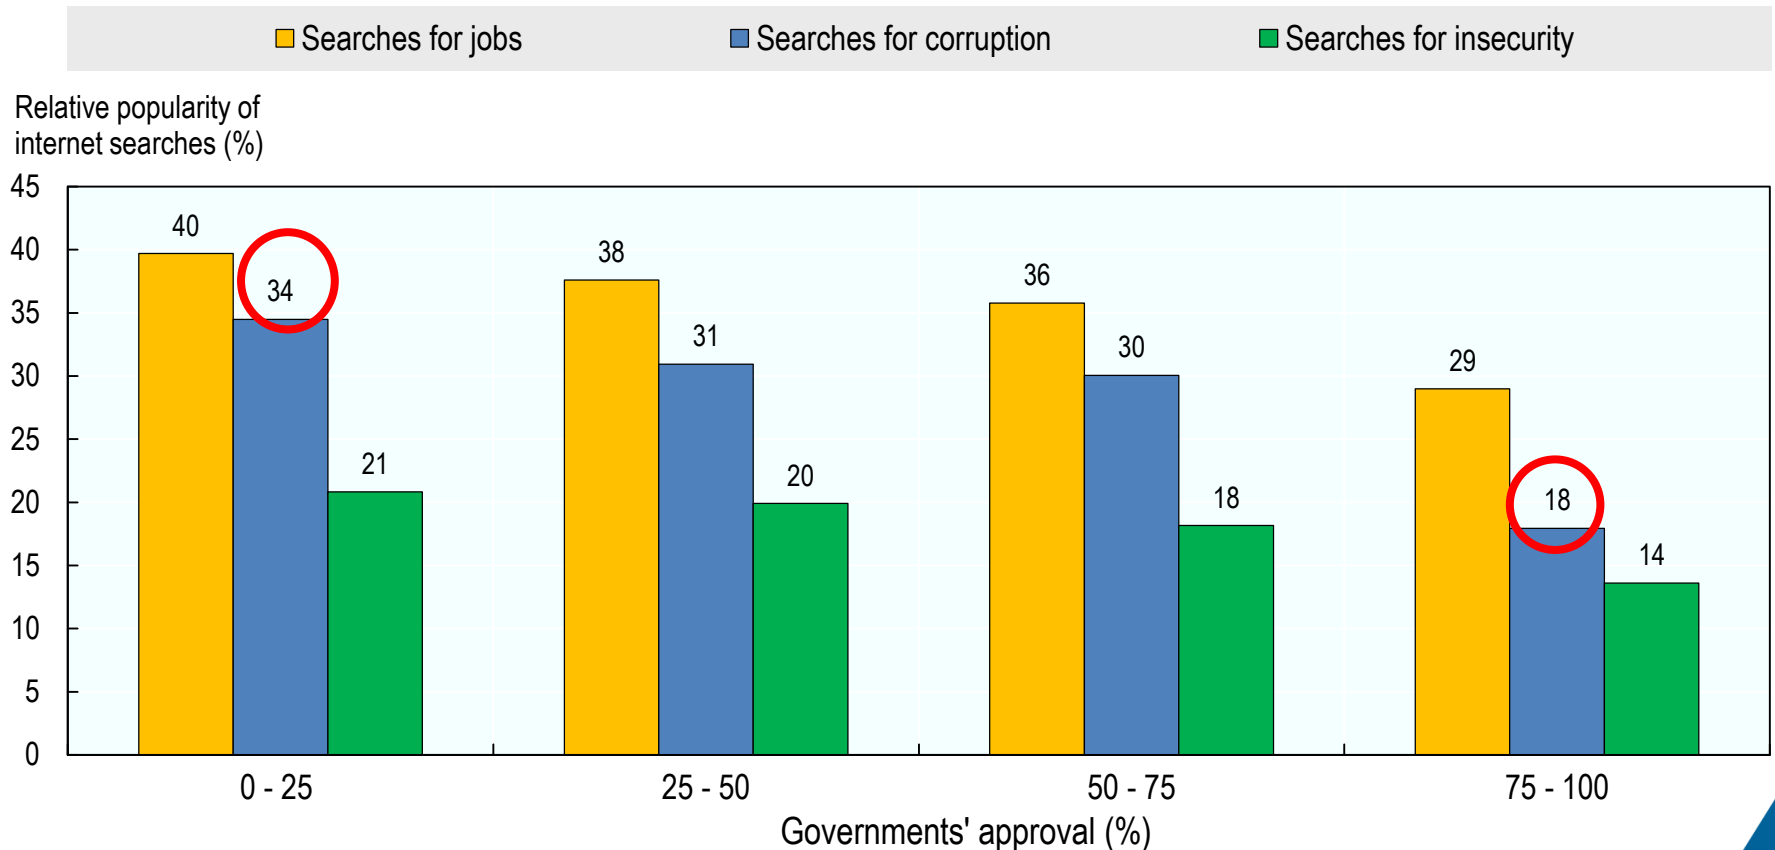

Comparison of actual and predicted well-being outcomes for the LAC region, and for the best and worst performing countries, given GDP per capita

Digital transformation brings unprecedented opportunities to measure subjective well-being

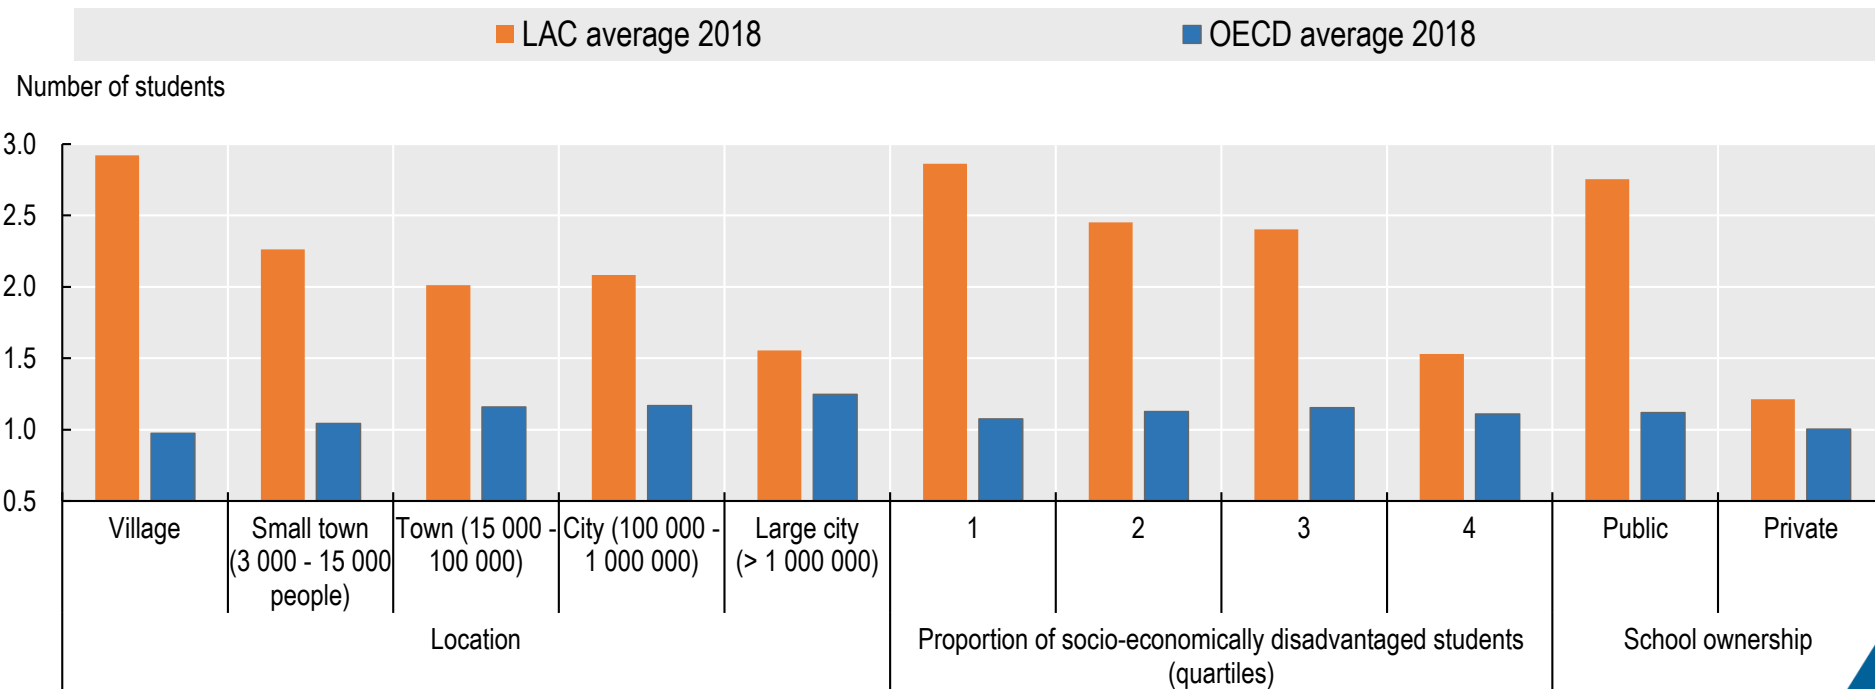

Popularity of searches in Google for corruption, jobs, and insecurity vs Governments' approval rates

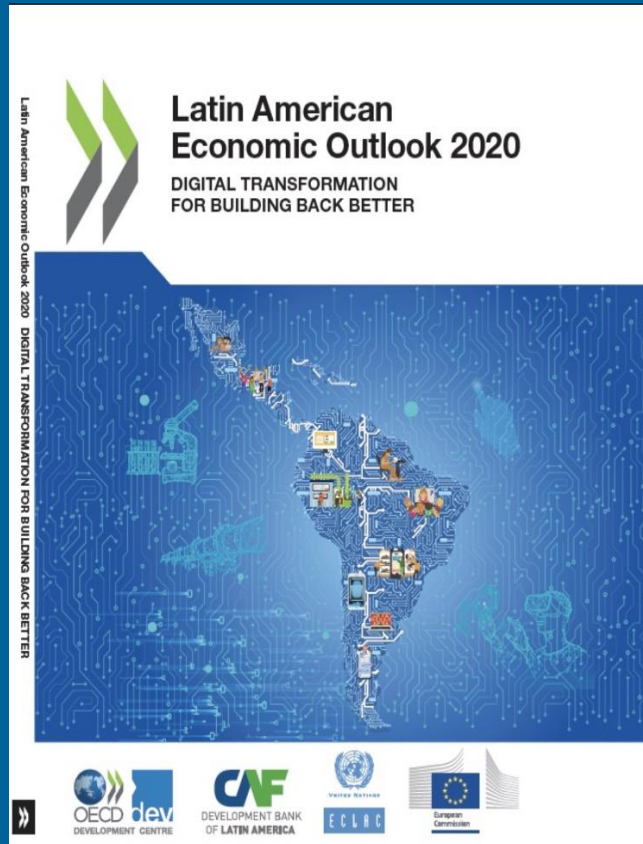

There are large gaps in access and connectivity associated with aspects such as location and socio-economic status

Number of students per computer and per Internet-connected computer by socio-demographic characteristics, LAC and OECD averages, 2015 and 2018
